Stella con cifre

Istruzioni

Si può appoggiare la sagoma sotto la tavoletta (vedi ill. 1) oppure si possono ritagliare i cerchi ed il quadrato e appoggiarli sulla tavoletta. (vedi ill. 2)

Avvolgere quindi il filo seguendo i numeri (secondo le tabelline) attorno i bastoncini di legno. A seconda delle tabelline si ottengono diverse forme di stelle. In questo modo è possibile imparare le tabelline divertendosi.
