Safety notes

Please note the following safety points when using Acrifix

1. Acrifix is flammable and should be kept away from naked flames. It burns at 430 C
2. It can irritate eyes and skin and nose / throat if breathed in. For these reasons use Acrifix in a well ventilated room. Do not eat or smoke when using Acrifix. Do not wash any used glue into the drain system. Be careful of its use in situations of static electricity.
3. Its main active chemical ingredient is Methymethacrylat
4. This product is delivered in a stabilised condition. Overlong periods of storage and high temperatures can cause it to polymerise
5. It is the users responsibility to ensure that Acrifix is used in a well aired room and not to swill left over glue in a sink, or in the drain system.
In case of fire use either of the following:

Water stream
Foam
Powder or CO2 extinguishers

Do not use a powered jet of water. In case of large fires wear breathing apparatus.

7. If spilt in small amounts cover with sand and then remove
8. Adhere to normal safety precautions during the application of Acrifix
 - Eye protection: Wear safety glasses.
 - Hand protection: Wear plastic gloves
 - Body protection: Wear an apron
 - Fumes: Wear a mask if exposed to fumes for long periods of time

Do not eat drink or smoke during the application of Acrifix. Keep away from naked flame. Store in cool place.

FIRST AID

9. If Acrifix comes into contact with skin, wash off with soap and water. Should a rash develop contact your doctor.
10. If Acrifix comes into contact with the eyes, wash out with large amounts of water and contact your doctor.
11. If Acrifix is swallowed contact a doctor at once.
